

ReFlo Technology

Sustainable Engineering

ReFlo Technology uses the highest quality recycled plastic, ensuring our products are both sustainably engineered and built to last.

- ✓ High-quality sustainable recycled plastic
- ✓ Same Numatic reliability, durability and quality
- ✓ User-friendly, eco-friendly cleaning

Numatic

We continually review, refine and adapt our manufacturing processes to deliver even greater levels of sustainability throughout our product ranges. Following extensive research and testing, we have introduced ReFlo Technology to our VersaCare and CleanCare ranges. Our teams are working hard to expand the use of sustainable materials across the Numatic product range wherever possible.

ReFlo Technology uses the highest quality recycled plastic, delivering the same Numatic reliability, durability and quality as always.

The tough construction and extensive testing programme ensures our products are both sustainably engineered and built to last.

*Stated figure represents maximum use of recycled plastic within the ReFlo range, not including kits and accessories.

BUILDING on Sustainability

We recognise the need and demand for sustainable cleaning solutions, without compromising productivity or quality.

Our Sustainability Formula

Built to Last

Built to Last

Our products are built to last; with tried, tested and trusted designs, ongoing innovations, and a commitment to developing sustainable cleaning solutions.

Efficiency

Efficiency

We ensure our products are the most efficient for every user; from water and detergent usage to electricity consumption. We also provide online-training for help and support.

Serviceability

Serviceability

Our products are designed to be easily and economically serviced throughout their lifetime. Not only this, but we can still service and provide replacement parts for every product we have ever made.

Recycling

Recycling

We are committed to developing products using high-quality recycled plastic. Right from the initial design, our products are manufactured to be easily recyclable at the end of their life.

Disposal

Disposal

We have worked hard to ensure Zero Waste goes to Landfill and since 2017 we have achieved this. Anything that cannot be recycled is incinerated.
